Bring home theater to light.

A RadioRA home theater package allows you to fully-integrate your lighting with your other home theater components. Choose between infrared or touchscreen control options.*

RadioRA systems are designed to work in new, or existing homes. You can easily expand your system at any time with additional dimmers, controls and accessories.

RadioRA dimmer in white with Claro® wallplate

RadioRA dimmers replace ordinary switches and feature a gradual fade-to-off.

RadioRA® | home theater packages

RadioRA cordless tabletop master control

Home theater light control system for new and existing homes

Create the ultimate home theater experience.

4 areas of light

Audio/Video Package

Control four areas of light with this infrared (IR) integration package.†

Use a popular multi-function IR remote* to integrate lights with other home theater components, or recall favorite lighting scenes with the Lutron IR remote.

Audio/Video Package (RA-HT-IR-xx)

Enables simplified infrared control of lights and A/V components.

- package includes:
- (4) 600W dimmers
 - (1) cordless tabletop master control
 - (1) signal repeater
 - (1) IR remote control
 - (1) IR interface

Touch a button on your cordless tabletop master control to set the scene for movies, music, intermission or entertaining.

4 areas of light

Touchscreen/PC Package

Control four areas of light and connect to your home theater system.†

Integrate your lights with other components* for simplified home theater control.

Touchscreen/PC Package (RA-HT-RS232-xx)

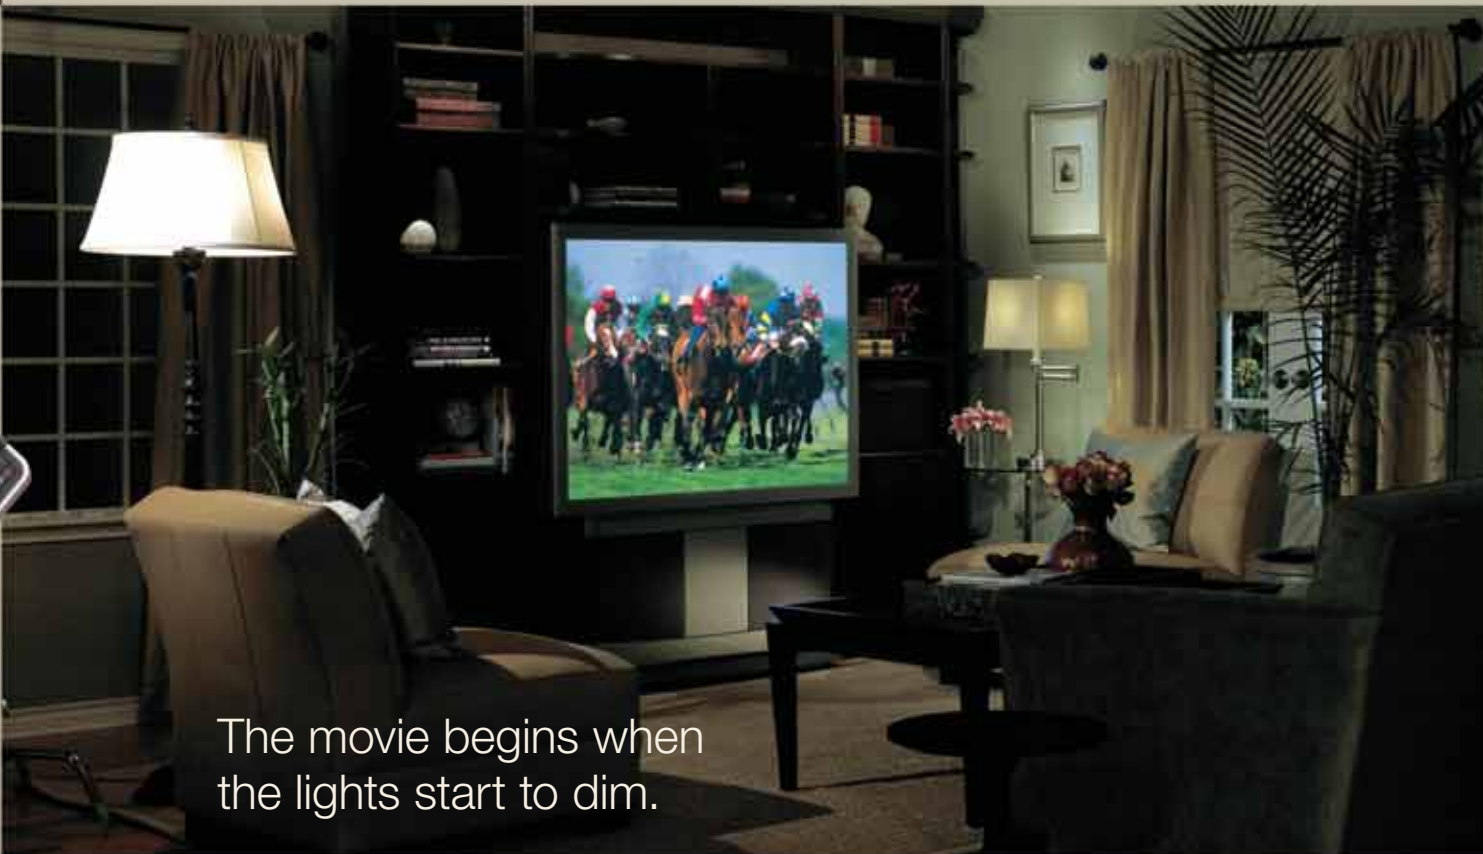

Integrates light control with a touchscreen-controlled system.

- package includes:
- (4) 600W dimmers
 - (1) cordless tabletop master control
 - (1) signal repeater
 - (1) RS-232 interface

Press Play:
Lights slowly dim and the movie begins.

Press Pause:
Movie pauses as lights brighten slowly, creating a pathway to other rooms.

With a RadioRA home theater package, your lights and other home theater components will operate in perfect harmony—creating a true cinematic experience.*

The movie begins when the lights start to dim.

dimmer replaces existing dimmers or switches to control individual lights in each room

infrared receiver receives IR signals from universal and learning remote controls

cordless tabletop master control controls system lights and scenes from anywhere in your home

RS-232 interface communicates with touchscreen/computer-based systems

infrared remote control create and recall up to four lighting scenes in your home theater

signal repeater ensures reliable communication between system components

† An area of light consists of a light—or group of lights—controlled by one switch or dimmer, in one or more locations

* Optional components are available from other manufacturers
